

### Instructions to install the chicken loop upgrade kit

Open the chicken loop housing. Attach the safety line to the swivel and to the donkey dick holder through the bar.

Run the depower line through the swivel.

Run the depower line through the line guides in red and black part in the depower strap. (depower line going only through red part in picture)  
Attach the black ball and the stopper.

Run the depower line through the hole in the metal part of the chicken loop.

Run the depower line second time through the stopper and the black ball.

Tie the depower line to the depower strap.

Hide the end of the line inside the strap.

Attach red pigtail to the mickey mouse swivel ear and gray pigtail to the right front line.

Attach the metal ring to the gray pigtail.

Attach left front line to the red pigtail and cover the swivel and lines with the neoprene cover.

Adjust the depower strap to a proper distance and close the chicken loop housing.
